

MaiA DS2

Amplifier up to 1,000 Euro: „MaiA DS2: Saving space has never sounded better.“

From a technical perspective, this amplifier may look weak, due to its size, but performs like a big star!

The MaiA DS2 offers an unbelievable variety of connections and surprised in the test again and again due to the consistently high-quality implementation.

In any case, one did not have the feeling of needing a bigger amp on the full-blown three-way floor boxes used for this test.
