

CD Box S3

**stereoplay
Highlight**

“Does not need to hide from more expensive CD players”

- It is wonderfully small (20 × 5 × 16.5cm), impresses with the typical, very well-made Pro-Ject aluminum dress and its equipment or its range of functions should not pose any problems for anyone.
- **Measurement-wise, the S3 convinces.** Distortions play no role at all.
- In the listening room, the impression was confirmed that the CD Box S3 **plays music wonderfully smoothly and lively** is **very accurate** and doesn't need to hide from more expensive CD players.
- So inconspicuous, **so good: pretty, affordable CD player** with basic feature-set and **very good sound**.
