"Gives a touch of musicality and life to any CD I played."

- The DS3 is a **different animal**. The first thing that caught my ear was the sound stage – this was huge. Beautiful musicality smooth and easy to listen – **incredible pleasure for my ears**.

- **Bass was solid** playing incredibly **deep** – not aggressive or punchy but **warm and balanced** giving **good tonality** to the instruments and voices.

- On the DS3, I got the **smoothness** I was looking for. What I really appreciate about the DS3 is the **sense of air** around the instruments and voices. The room was filled with **music and life**.

- The **imaging and the sound stage** on the DS3 was better – the difference was in the sound stage that was wider.
