

# Debut PRO

[Visit the Website](#)

**"One of the best buys in this price range"**

- It's **perfect** for the music lover with a large or small record collection, and **the sound sparkles** like a star.
- The cheaper Debut PRO is **so close to the sound of an X2** that the PRO model will be a **better buy** for many.
- It delivers a **big enough soundstage** with credible **depth and potent bass** response.
- Acoustic instruments sound **free and weightless**, and the turntable delivers **sparkling guitar tones** with **good dynamics** from the strings.
- The dynamics have noticeably **more contrast** and the bass is reproduced with **greater authority and weight**.
- The Pro-Ject turntable, brings out the **nuances** of the vocals with an **eerie realism**.
- The Pro-Ject Debut PRO is one of the **best buys in this price range**. Few turntables can match the PRO release's **impeccable qualities**.
