Stream Box S2 Ultra

Visit the Website

- With the Stream Box S2 Ultra, the versatility, convenience, and especially the unique music playback and control software Roon come into play even more elegantly.
- Everything is displayed wonderfully clearly in the own app, quickly merged by the system, and is immediately available due to quick access times.
- You can easily hear details that fade away gently in the background, while their spatial context is also more clearly defined and presented more precisely.
- The Pro-Ject Stream Box S2 Ultra gives the mids and the bass more color, more speed, and more weight.

- The Stream Box S2 Ultra allows almost immediate and direct access to music.
- The Stream Box S2 Ultra spans an authentic, broad, and deep space and, in the case of natural instruments, presents the correct ratio between physicality and size.
- If you don't accept compromises in usability and sonic performance, this is the one for you.
- In terms of sound, the Pro-Ject Stream Box S2 Ultra is top-class, whose performance is unbridled with liveliness, high naturalness, and enormous expressiveness.
