

Clamp IT

"The improvement in performance is considerable"

- I've never used a Debut with any form of clamp up to now, but a few minutes listening to the Carbon Evo with it fitted is enough to convince me that this is something that should be on any owner's to-do list.
- With it fitted, there is an appreciable and immediate improvement in fine detail and clarity. Even on a perfectly flat record, the Clamp IT demonstrates an immediate and tangible benefit.
- Even with the standard metal platter it has a beneficial effect, but combining it with the acrylic upgrade unit and clamp is more effective still.
- The way the upgraded turntable handles music is more spacious, detailed and effortless than the stock deck is able to manage.
