Stream Box DS net is Pro-Ject Audio's fully equipped audio streaming client & internet radio, that is able to play music stored in network servers (computers, NAS drives, etc) connected to your home network. Stream Box DS net includes powerful audiophile features. Ready for use with streaming service Spotify, it will support HD audio music platform Tidal soon. Other streaming services like Deezer, Grooveshark etc, can be implemented using 3rd party applications. Superb audio playback including 24bit HD music is self-evident, like outstanding technical data for distortion and noise levels. Navigation can be done via IR remote (which is included) and/or free Android / iOS App.
