**It has all the warmth and weight
the vinyl format is famous for...**

- The Pro-Ject is a wildly detailed listen – even the barely there transient details are picked up on and handed over
- ...allows every record to sound coherent and convincing.
- The finish is flawlessly smooth, and as reassuring as the build quality.
- ... this Pro-Ject glides along with the sort of casual authority of sound that can only come from a well-sorted record player.
- But if you value a smooth, informative ride from a beautifully engineered and nice-looking record player, don't spend any money until you've heard the Debut Carbon Evo.
