"The sound signature flirts with the analog side of life"

- The **rich, bright tones** of the plucked strings underlined the **atmosphere**.
- The Pro-Ject duo comfortably laid out the **soundscape**. The **warm cues** are a tribute to **vinyl sound**.
- The **aesthetic look** on the shelf is great.
- Kudos for the headphone output on the front. The **dedicated** small headphone **amplifier** **sounds very good**.
- The two Pro-Jects have to follow the rhythm guitars. We need gritty dirt from left and right. Everything powerful on the rhythmic one. **It worked great, with a nice edge**.
- A CD/DA-converter combination has to put things **in order** on the one hand but, on the other hand, also **swing**. The drive and converter did precisely that, with **bold and punchy bass**. Also, the brass section **spread out in a stereophonic cinemascope**.
