

Debut Carbon EVO

"The turntable with much higher performance than price"

- My impression was a **clean, strong, and direct reproduction**.
- The Debut Carbon EVO offered **great detail, space, and a good rocking atmosphere with plenty of bass**.
- That's where Pro-Ject showed that it is capable of retrieving **many details out of the groove with finesse**. Musicians were placed **accurately in their space**.
- It played all kinds of genres with ease offering **loads of dynamics, quality timbre, and an emotional quality** usually reserved by much more expensive decks.
- Big orchestral material played **with authority with very accurate placement**.
- The Debut Carbon EVO **cements its position in the market** by doing a **great job**. It became somewhat of a **little king among the simple, affordable turntables** whose performance is miles away from its price.
